POSSIBILITIES FREEDOM INNOVATION

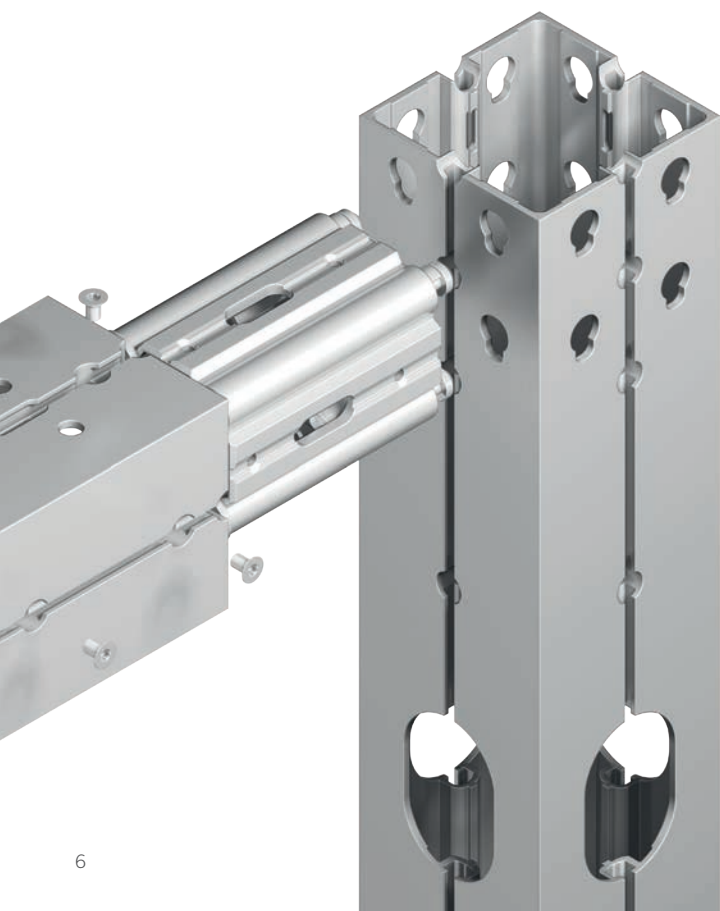

FOR YOUR PROJECT

The basis of your project. With a secure and structurally strong connection of lock and bolt. Flexible beams making full use of the available space. Intuitive planning tools. All this makes OCTAuniversal much more than a simple framework construction: a universal system for exhibition construction, interior design and individual projects. A look forward into the future. For the first time, a modular system provides the possibility of using

OCTAUNIVERSAL

LED panels. Combined with existing systems from Maxima to OCTAlumina, OCTAuniversal unfolds its full potential. Freestanding with a height of up to 6 m. A countless number of options and connections. You are looking for a system with no limits that is ready for the future? You found it.

OCTAUNIVERSAL

Bolt and keyhole. A secure connection.

The tension lock connection is complemented by additional bolts. This allows for an exact calculation of the individual beams' load capacity.

Use your space. To the very last centimeter.

Thanks to variable beams, the design of OCTAuniversal goes beyond the standard system grids of 990 and 1,000 mm. This flexibility enables utmost utilization of the available space and perfect adjustment of the stand size.

Verifiable statics. 6 m tall.

With base plates mounted to the floor, stability, safety and statics of your construction are verifiable. At the edges, freestanding and up to a construction height of 6 m.

Freestanding and slim. With only 260 mm in width.

Better safe than sorry: With an additional 100 mm beam to double the construction, the freestanding wall unfolds its full potential. All in all, this makes a minimum width of only 260 mm.

As flexible as Maxima, as functional as OCTAwall custom.

Modular in design like Maxima, OCTAuniversal also allows direct fitting of panels like OCTAwall custom. As it can also be combined with our other OCTANORM systems, it virtually offers infinite possibilities.

LED panels – bring your vision to life.

Technology continues to evolve. OCTAuniversal brings state-of-the-art media technology into system construction and provides the corresponding framework. Bright moving images that light up your message are a highlight in any advertising space.

DIVERS 3-DIMENSIONAL EXPRESSIVE

A PLUS ON ALL LEVELS

More freedom. Less profile edges. OCTAlumina plus. Additional effects and designs make OCTAlumina plus something special: different layers of fabric and materials create a three-dimensional impression that changes with the viewing angle. Thanks to its three-dimensional design, OCTAlumina plus enables the realization of innovative

OCTALUMINA PLUS

illuminated room designs with a modern look in proven OCTANORM quality.

1 profile. 2 fabric grooves on front. 3 dimensions.

Fitted with another fabric groove, OCTAlumina plus offers new possibilities. By playing with two layers and different fabrics, you can create impressive 3D and material effects.

Slanted groove. Without profile edges.

Visible frame edges are a thing of the past now. The new profiles allow for a complete cladding with tension fabric, even of edges. Thanks to the new groove, slanted at 30°, the silicon edges are firmly tightened around the profile.

The solution for fabric corners.

OCTAlumina plus completely focuses on the image. Even in corners. Graphics are only separated by a 2 mm thin profile edge in the corners for a virtually seamless picture.

OCTALUMINA PLUS

Illuminated room. Illuminated door.

Build enclosed, freestanding rooms with OCTAlumina plus. If desired, also add flush-mounted illuminated doors. Create an impressive ambience that captivates the visitor and creates a lasting effect.

OCTALUMINA SPECIALS

Ceiling lamp | Fabric counter

OCTAlumina ceiling lamps

The round ceiling lamps are characterized by a minimalist design. A homogenous illumination provides pleasant light. Equipped with modern LED technology – and with invisible cables leading to the ceiling.

OCTAlumina fabric counter

Our new modular folding counter comes with a basic equipment including illuminated front, fabric covered sides and two shelves. An optional transport bag is available for easy transportation.

UNIQUE LIGHT STRUCTURES OPTICAL DEPTH EFFECT THE NEW SPECIAL FABRIC

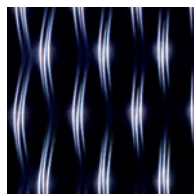

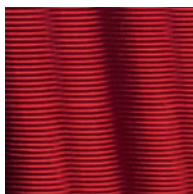

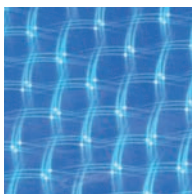

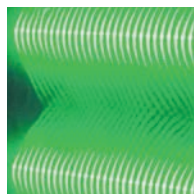

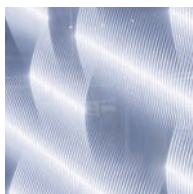

Invisible light source. Maximum effect.

Light structures. Formed by individually arranged LEDs and a special backlit fabric. Single light points are effectively bent, then become invisible and create artful structures.

Maximize your space. Automatically.

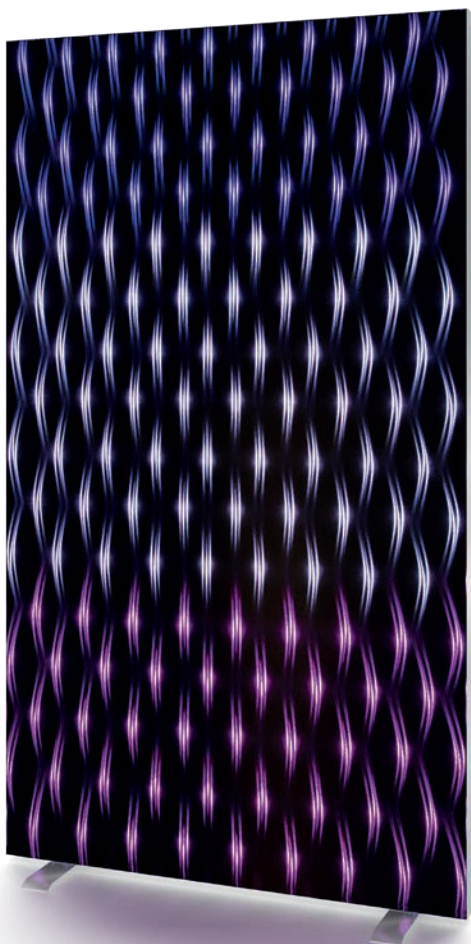

Small rooms can be visually enlarged using the depth effect. Light arcs produce a three-dimensional effect that makes any room appear larger. OCTAmesh creates a spacious area of well-being.

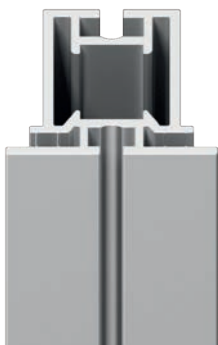

STRUCTURAL LIGHTING OPTIONS

OCTAMESH

OCTAmesh lux I miracle

**ONE SOLUTION.
FOR FABRIC AND PANELS.
THE ALL-ROUNDER W 906.**

Because it's your decision if you want fabric or panels.

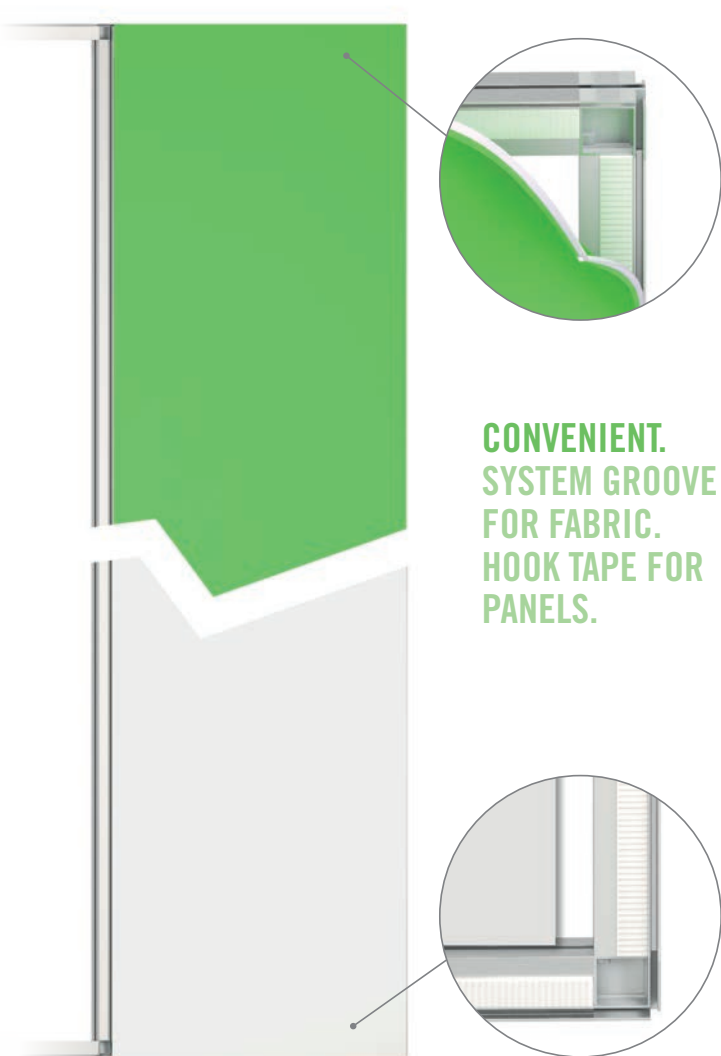

OCTAwall 40 fabric + panel means more flexibility: both sides offer the possibility of using fabric or panels. This doesn't just make OCTAwall 40 incredibly flexible. It also makes storage and transportation easier, because from now on, all you need is one extrusion!

Today fabric - tomorrow panel.

The high quality hook and loop tape proves itself through the safe and tool-less installation of panels. The well-proven system groove and silicone edge system adds tension to your fabric. Together, they offer a modern surface look and utmost flexibility.

OCTAWALL 40

Fabric + Panel

**SEAMLESS FABRIC CORNER.
NO COMPROMISE.
THE S 382 CORNER PROFILE.**

Flexible. Without interruption.

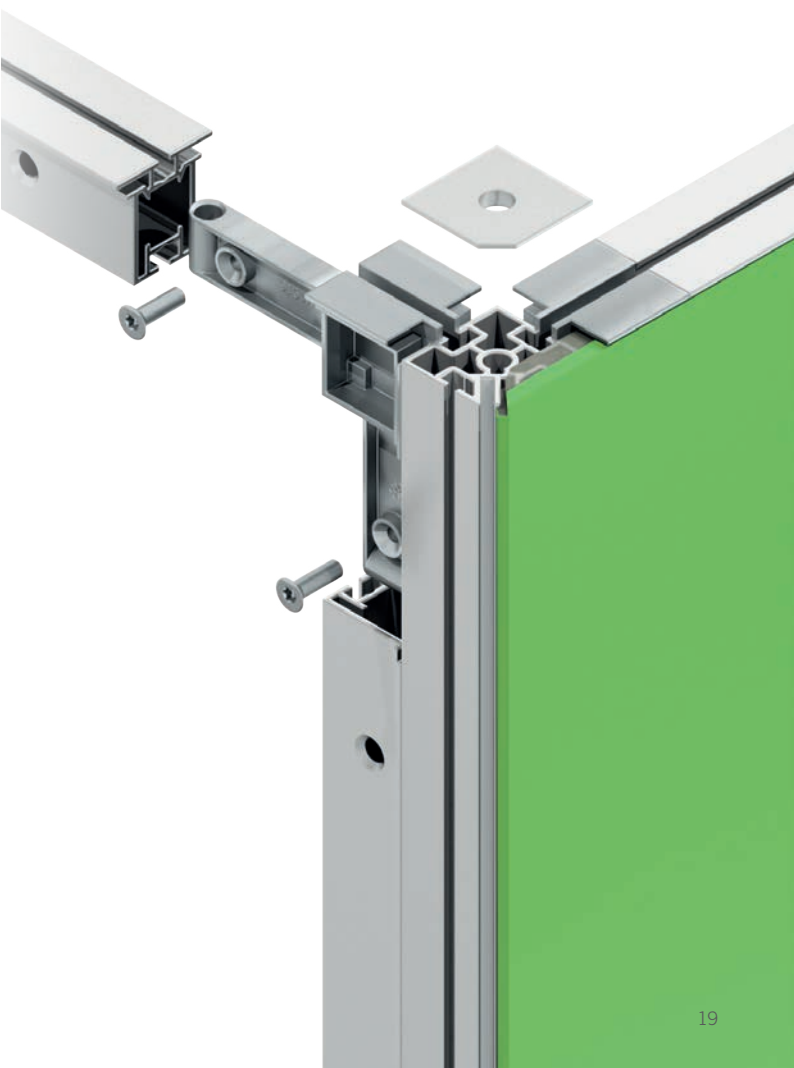

Thanks to the new S 382 corner profile, there will be no visible corner upright anymore. The straight corner and minimalistic design allow for around-the-corner graphics, offering maximum advertisement space.

Think outside the box. Seamlessly.

The W 916 corner connector allows for a seamless continuation of your graphics to the corner. This creates the possibility of an almost completely covered corner profile. The S 383 cover plate keeps the silicone edge safely in the system groove and closes off the profile.

OCTAWALL 40

Fabric + Panel

SIMPLE SUSTAINABLE VERSATILE

ELEVATE YOURSELF

OCTAelevate floor – simple and versatile. Suitable for all occasions, be it indoors or outdoors. The high amount of cable outlets allows you to quickly and easily install your cabling where you need it. Stackable feet allow height adjustments of individual panels. OCTAelevate is a floor system which can be universally used and is installed in no time.

OCTAFLOOR

OCTAelevate floor

Use: indoors and outdoors.

The floor panel is made from weatherproof, recycled plastic, making it suitable for indoor and outdoor use. The material is nonsensitive to moisture and thermal fluctuation.

No more cable tangle.

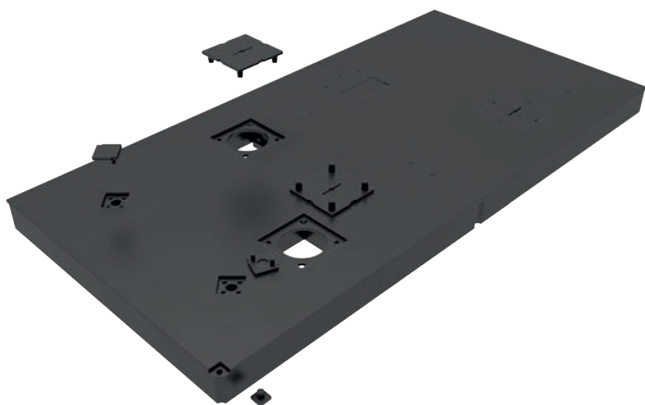

The standard floor panel is 998 × 499 mm and has 29 possible cable outlets per m². The perfect solution even for last minute adjustments – without much hassle.

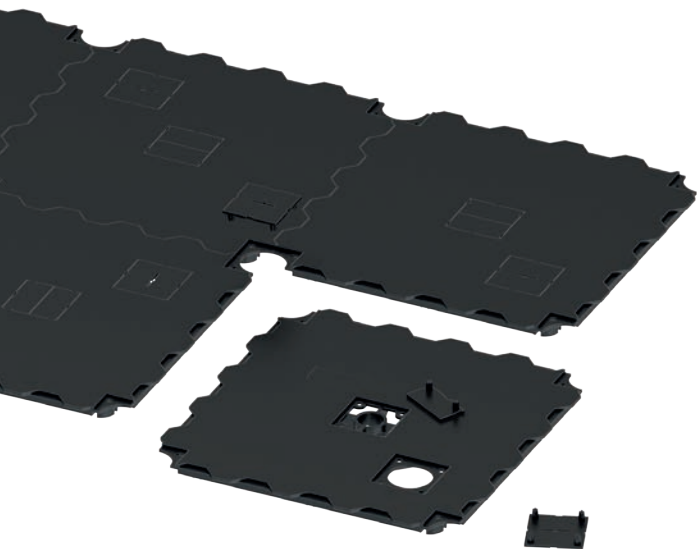

Stacking. Easily.

The OCTAelevate floor comes with highly robust and easily stackable feet. Realize landing heights of up to 270 mm in 55 mm steps. Without any additional accessories.

Compatibility.

The floor panels of OCTAclassic floor are combinable with the ones of OCTAelevate floor. The illuminated edges from the OCTAclassic floor can easily be used to make the OCTAelevate floor stand out from the surrounding hall floor – visual trip protection included.

QUICK EXTREMELY FLAT HEAVY DUTY

BIG IMPACT IN LITTLE TIME

Big areas, but little time? With OCTAeco floor you can realize big, heavy-duty areas in little to no time. Weights of up to 20,000 kg/m² are no problem. In any weather, since the event and exhibition floor is suitable for outside use. Save time and personnel. Be it cars or heavy machinery, the OCTAeco floor is always the right foundation. Again and again.

OCTAFLOOR

OCTAeco floor

Big areas. Little time.

The OCTAeco floor's biggest advantage is the fast installation. Big areas – effortless.

For heavy weights of up to 20,000 kg/m².

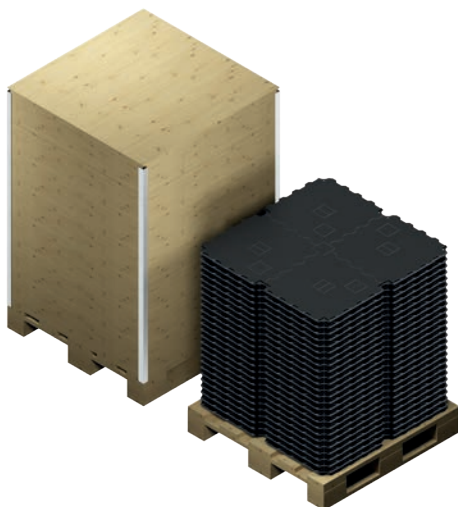

The well thought-out design offers maximum stability, making the floor perfect for high loads. You can even drive on it. The material is nonsensitive to moisture and thermal fluctuation.

Effortless assembly. Thanks to a simple connecting system.

The low weight in combination with the smart connector system allow for a quick and easy installation of your floor. Even with little personnel.

Individuality. With a system.

The panels can be turned by 360°, allowing for a maximum of 21 possible cable outlets per m². And if you need individually adjusted special panel shapes, OCTAeco floor also offers a panel that can be cut to size.

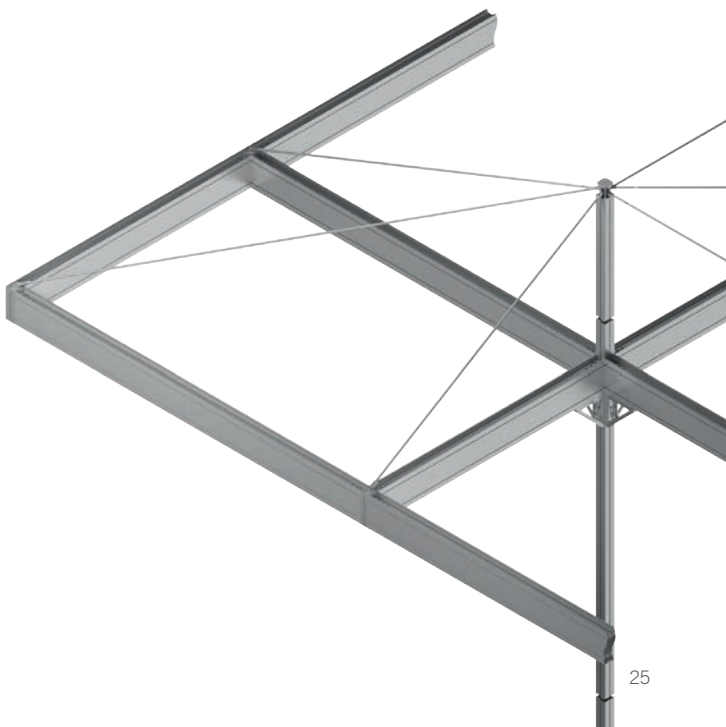

OCTARIG

Secure on uprights. Without suspension.

OCTARig cannot only be hung from the ceiling but now also rests on uprights thanks to our new nodal connector. Adequate bracing ensures additional stability. Standing tall, the system opens up new possibilities for your stand design.

Pylons – an outstanding height of 3000 mm.

The pylon structure enables a self-supporting corner of up to 3000 mm, only secured by clamping elements. No need for additional ceiling suspension. It's up to you to choose the position of the uprights, OCTARig is giving you all the freedom you need.

OCTAWALL CUSTOM

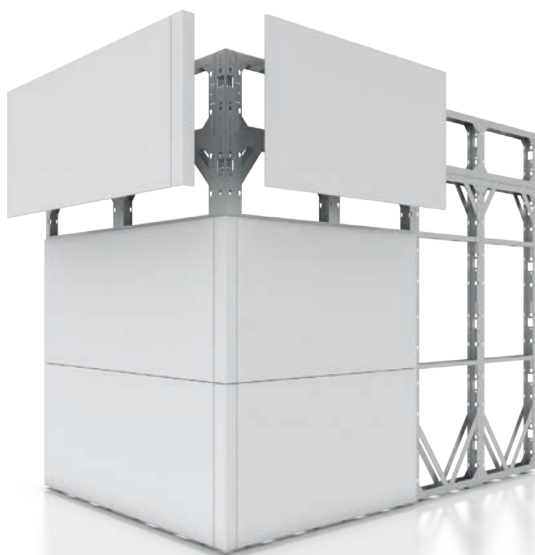

Rental

Leasing instead of buying.

Stocking up on your equipment as needed – or opting for temporary rental of the system? No matter how you decide, the possibility of renting allows you to immediately react to short-term orders and execute them in reliable quality. At the same time, you can save on costs for stock keeping and technical maintenance.

Buying instead of leasing.

The system delivers a convincing performance in every single application. Use OCTAwall in your next project and get to know all its facets first. If you decide on buying the system at the end of the rental period, you may do so on hire purchase.

SOFTWARE

OCTAcad | OCTAdesign

OCTAdesign is now Oculus Rift ready.

With the new VR feature, OCTAdesign 2018 gives you for the first time the opportunity to experience your booth designs, rooms and OCTANORM constructions with a VR headset from Oculus Rift. And this in an entire new way - spatially, in virtual reality. In addition to this attractive and innovative presentation in front of your customers, the VR feature is also practical and saves you valuable time. Proportions and dimensions can be experienced early in the planning phase, making it easy to remove deficiencies and implement changes.

New WebGL features and OCTANORM systems.

With OCTAdesign 2018 we significantly enhanced the WebGL functions. In the future, video content that is placed on walls can be played back within the 3D model. In addition to light and colors that can be edited, the improved editor can also be used to change materials directly in the 3D presentation. Of course, OCTAdesign 2018 will receive all new systems and components, above all OCTAuniversal and OCTAlumina plus.

OCTAcad with detail improvements.

OCTAcad has also been updated for the 2018 version and is now fully compatible with Autodesk Autocad 18. As with OCTAdesign, all new components and systems are integrated in the new version, especially OCTAuniversal and OCTAlumina plus.

You will find all the new features and details on our website at:
