### UNIQUE LIGHT STRUCTURES OPTICAL DEPTH EFFECT THE NEW SPECIAL FABRIC

#### **Invisible light source. Maximum effect.**

Unique light structures. Created by a special effect fabric and individually arranged LED backlights. Single points of light are effectively bent, become indistinct and form artful structures.

#### **Maximize your space. Automatically.**

Small spaces in particular can be visually enlarged by means of the depth effect. Light arcs produce a three-dimensional effect that makes any room appear larger. OCTAmesh creates a spacious area of well-being.

#### **Technical details:**

- special fabric mounted to a high quality aluminium frame (standard silver color, other colors on request)
- 2 fabric variants and light sources available for different effects
- ready to use immediately via plug and play
- comes with highly efficient LED technology
- color change thanks to RGB LEDs (creating a total of 16.7 million possible colors)
- depth effect
- varying 3D effects depending on viewing angle
- different structural and color options
- also available as acoustic module
- maximum fabric width: 1900 mm

## 2 DIFFERENT LIGHT SOURCES WAVES OR NETTINGS COUNTLESS POSSIBILITIES

LED STRIP  
OM 110

3-POINT LED MODULE  
OM 103

### 2 light sources. Different effects.

Whether you go for continuous waves or an interwoven netting of light – it all depends on the chosen light source:

**LED strip:** light bands in different lengths result in a striped pattern of individual light arcs. Arranged one above the other, they create a stunning wave effect.

**3-point LED module:** three slightly offset points of light are visually bent by the fabric and form a structure of interwoven light.

Since both light sources consist of RGB capable LEDs, you can play with a total of 16.7 million colors.

Further unique effects can be realized using a variety of light sources and dimmers – there are almost no limits to your creativity. Set about opening up new application possibilities and discover the individuality of OCTAMesh. If desired, we also offer customized solutions.

## LUX | MIRACLE

## 2 DIFFERENT FABRIC VARIANTS HORIZONTAL OR VERTICAL YOUR INDIVIDUAL RESULT

OCTAMESH LUX

OCTAMESH MIRACLE

### Light arcs to suit your individual taste and requirements.

Every single point of light is bent into the same direction that comes from the special fabric. Depending on how the fabric is attached to the frame, the light arcs will therefore either be horizontal or vertical.\* As long as the lights are off, you see nothing but the fabric adding a sophisticated note to the frame.

In addition to choosing the running direction of the light arcs, you can also decide between two different kinds of fabric:

**OCTAmesh lux:** keeps points of light visible and lets them appear as additional highlights at the utmost points of the light arcs. Available fabric colors: white and black.

**OCTAmesh miracle:** transforms points of light completely into light arcs and makes them disappear. The light arcs are longer than those created by OCTAmesh lux. Available fabric colors: anthracite.

\*maximum fabric width: 1900 mm, in direction of light arcs  
up to 30 m possible
