

OCTA WALL PRO

OCTAWALL PRO

A FRAMING SYSTEM THAT MAKES ANYTHING POSSIBLE: LED-VIDEO WALLS, FABRIC, PANELS

LED-video walls as eye-catchers!

Vivid pictures and radiant colours: the integration of LED panels makes for a highlight at your exhibition stand. Due to the standardised frame dimensions, complete LED video walls can be mounted between the frames. The safety device in the system groove ensures a firm hold. And the best part: OCTAwall pro is compatible with LED tiles from different suppliers!

You decide whether you want fabric or panel.

OCTAwall pro allows you to mount fabric and/or panels on both sides. The high-quality velcro tape is convincing through its safe and tool-free assembly of the panels. The tried-and-tested groove and flat welt system brings tension to fabrics. The corner supports are almost completely covered by fabric for a modern surface appearance.

LED panels are placed flush between the frame elements.

TECHNICAL FEATURES

OCTAwall pro

Exhibition stand with curved frames, LED video wall and integrated monitor.

OCTAWALL PRO

FABRIC CORNERS: SEAMLESS CABLE: INVISIBLE YOUR DESIGN: IN THE FOREGROUND

In conjunction with Maxima.

In conjunction with OCTAWall 40.

Flexibility. Without interruptions.

With the corner extrusion no corner upright is visible. Thanks to the precise edge guide and an ultra-thin bar, fabric corners can be created that do not affect the overall appearance of the graphic and offer maximum advertising space. Cables are laid invisibly between the extrusions.

An unbeatable combination.

The system groove makes OCTAWall pro compatible with other OCTANORM systems: Don't only integrate LED panels, but also combine OCTALumina illuminated frames or use the flexibility of Maxima. Thanks to the double groove guide, even OCTAWall 40 frames can be attached flush to the system. Utilise the variety of our systems and make your stand design something very special.

Advantages and technical information:

- 80 mm frame depth
- a frame element for the installation of fabric and/or panel
- panel infill: 3-4 mm PVC rigid foam sheet
- fabric infill: Fabric with silicon welt
- Integration of LED panels
- easy cable laying within the extrusions
- OCTAWall pro is compatible with many other OCTANORM systems such as OCTAWall custom, OCTAWall 40, Maxima and OCTALumina

TECHNICAL FEATURES

OCTAwall pro

Cable laying in the cavity between the individual frames.
