**The entry into exhibition systems.**

octanorm.com

# simplicity.

**Simplify. No detours to one's goal. Focussing on the essentials.** Due to today's flood of information and the multitude of sensory impressions that affect each individual in a very short time, it is easy to become overwhelmed. Oversaturation sets in and further impressions are no longer perceived. Therefore the question is not: Communicate advertising messages or not? Rather: How can the attention of the customers be directed and maintained in a targeted manner to leave a lasting impression? Here are a few simple answers.

## Many booths in a short period of time.

A large exhibition hall with many different exhibitors? With **octaclassic** you can build a variety of booths in no time at all. Simple assembly thanks to patented tension lock technology and uniform components. Can be customised with numerous accessories such as shelf supports or wallwashers. Whether it's a row, head or island booth, the system adapts to your needs.

**Many booths. Quickly assembled.**
Consisting of uprights and beams, the construction can be assembled in no time – without a lot of individual parts. Thanks to a fixed grid, the extrusions can be combined again and again: flexibly adaptable to booth size and type. From small, connected row booths to large island stands: **octaclassic** allows you to create system booths in an easy way.

**Individual booths despite system construction? Definitely!**
Curved beams and an upright that can be connected at a 45° angle: Be creative and use the freedom to break out of the rectangular booth designs. The stand becomes alive and unique not only through its basic form, but also through the graphics. Choose panel, glass or fabric as a base. We have the right solution to show your advertising message to the outside world.

**Accessories to set the scene for your products**.
The system groove allows a wide range of accessories to be integrated: from shelves and picture frames to spotlights or cable ducts. Guaranteed to fit and easy to install. In addition to **octaclassic** counters and counter tops, the system can also be combined with other **octanorm** systems such as **octalumina** light frames. **octaclassic** is a system that can be easily expanded.

**Support for shelf E 713**

**Wallwasher M 1497 and cable duct E 460**

**Connection with tension lock Z 961/13**
