

ai booth designer

Design Tool

From idea to booth concept in record time.

ai booth designer.

What should your next exhibition booth look like?

Describe your ideas and the **ai booth designer** will turn them into visual booth concepts - in the form of a realistic 3D view, color sketch or black-and-white draft.

The AI tool combines planning, creative design and editing into one seamless workflow. **Planner. Designer. Editor.**

No design experience required. From real booth dimensions and individual design ideas to a refined concept.

ai booth designer

Design Tool

More speed. More clarity. More ideas.

Respond faster.

Create initial visual concepts for new projects and customer inquiries in no time..

Explore more possibilities.

Generate and compare different creative approaches.

Align earlier.

Make ideas visible and create a common basis for sales, planning, marketing and customers.

Video and individual branding.

Bring your design to life with moving images and add your own logo.

Get started more easily.

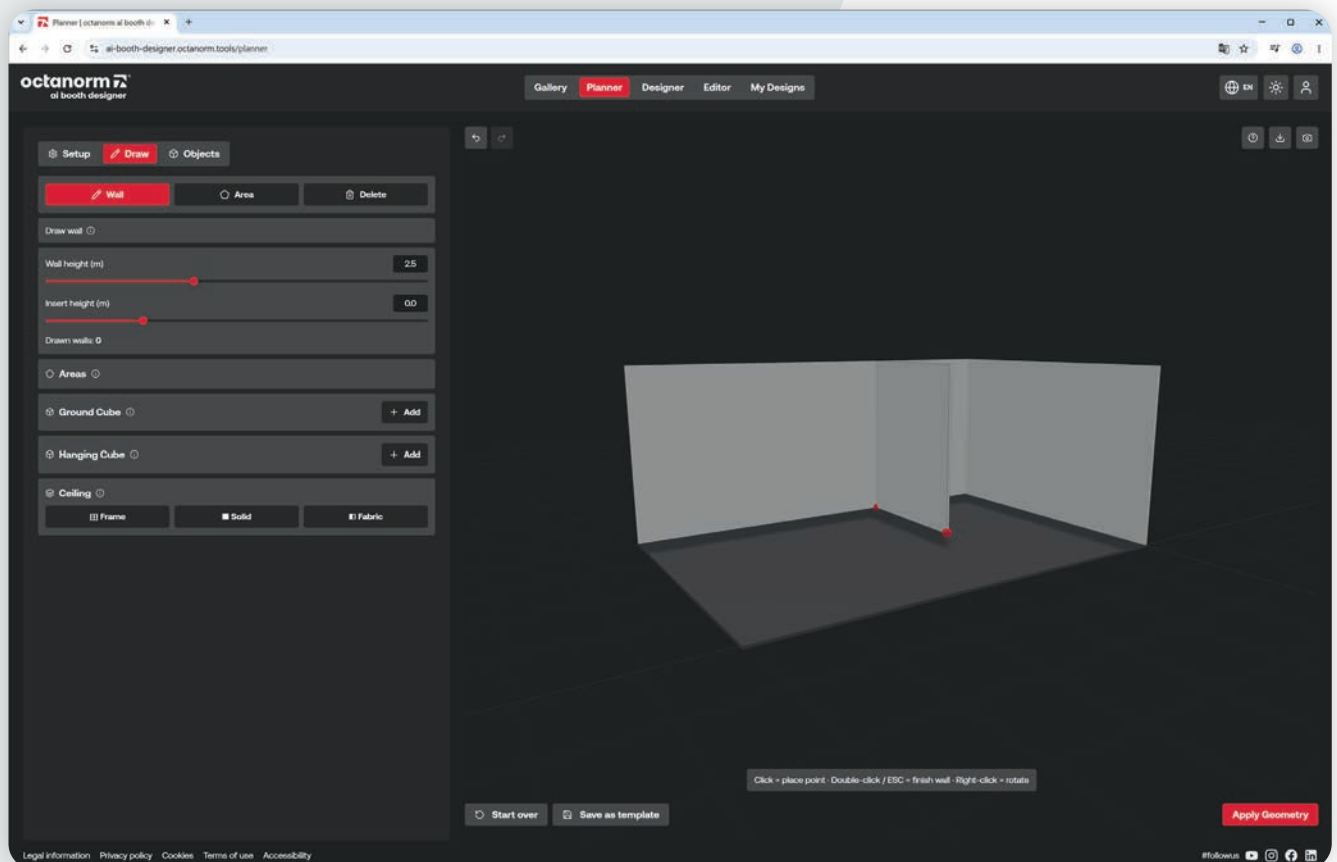

Create initial booth concepts quickly - even without extensive design experience.

Planner

Creativity meets real dimensions.

Use the Planner to lay the foundation for your booth concept. Define length, width, height and type of your booth to create a true-to-scale booth geometry. Add walls, ceilings and other elements, or start with an existing template.

The Planner allows you to draw your exhibition booths and outfit them with furniture.

Buildable 3D booth templates in a variety of sizes and booth types.

Plan. Design. Inspire.

ai Plan it yourself.

Create booth geometries directly in the tool and expand them as needed..

ai Build on what you already have.

Use buildable 3D booth templates or import your own CAD models.

ai Continue designing seamlessly.

Transfer your planned geometry directly into the Designer to develop an individual booth concept with colors, materials and graphics.

Designer

From planning to design.

In the Designer, you can give your exhibition booth an individual character. Describe the style, atmosphere, materials, colors and any other requirements and develop different visual design directions – such as a realistic 3D view, a color sketch or a black-and-white draft.

Even without extensive design experience, you can quickly explore different ideas and compare them with one another.

Create faster. Design smarter.

▸ Presets.

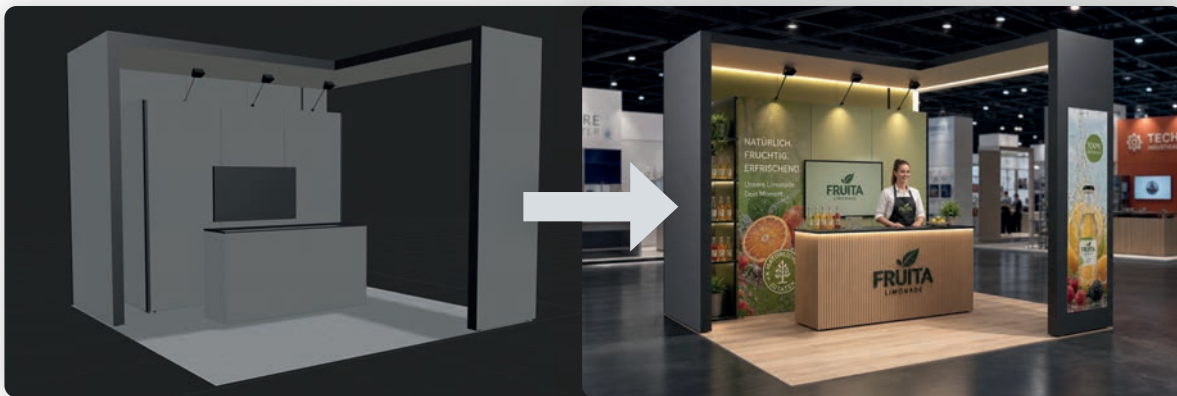

Save image format, environment or camera perspective once and reuse your settings whenever you need them.

▸ Brand templates.

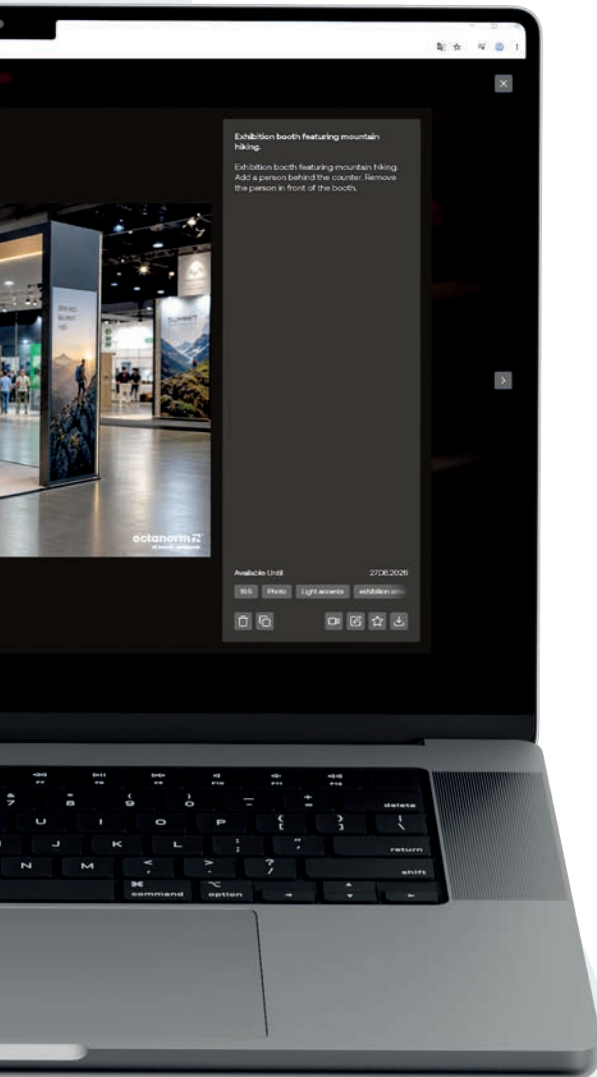

Add your brand identity via PDF, website analysis or manual input and apply it directly to new booth concepts.

▸ Explore creatively.

Try out new directions, compare them and develop them further.

Selectable environments, camera perspectives and individual prompts deliver a wide range of results.

Create individual booth designs as realistic images, sketches or videos.

Video & Branding

Develop. Experience. Present.

Turn a finished booth design into a short animation in just a few clicks.

Different camera movements, perspectives and effects provide a more dynamic impression of the concept - ideal for customer meetings, presentations or internal coordination.

With your company logo, all generated images and videos can also be presented directly under your own brand.

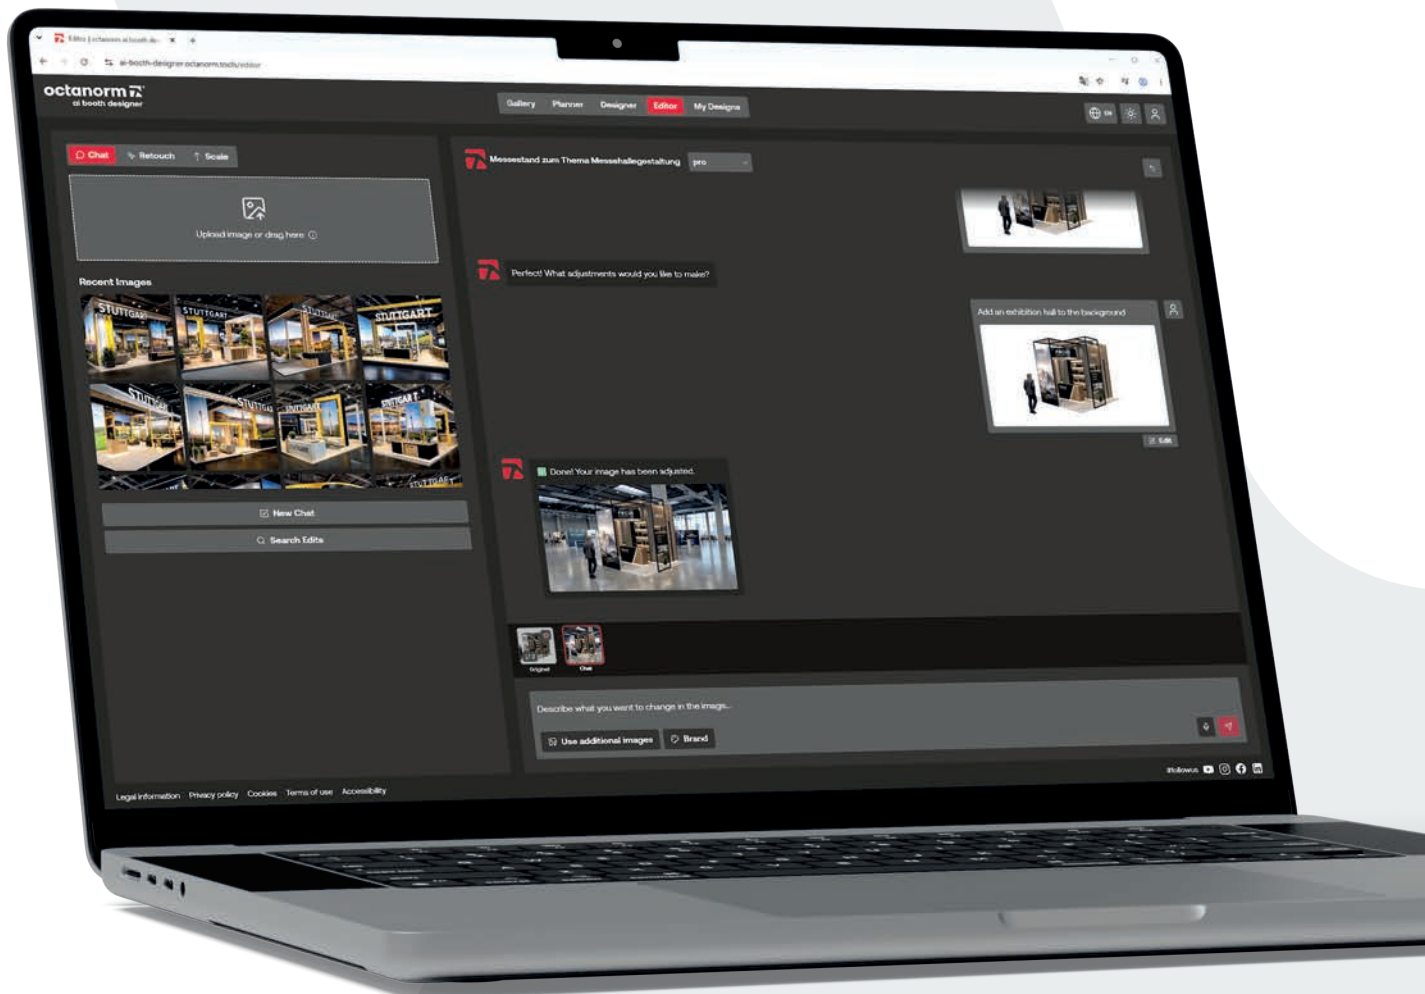

Editor

Modify. Refine. Take it further.

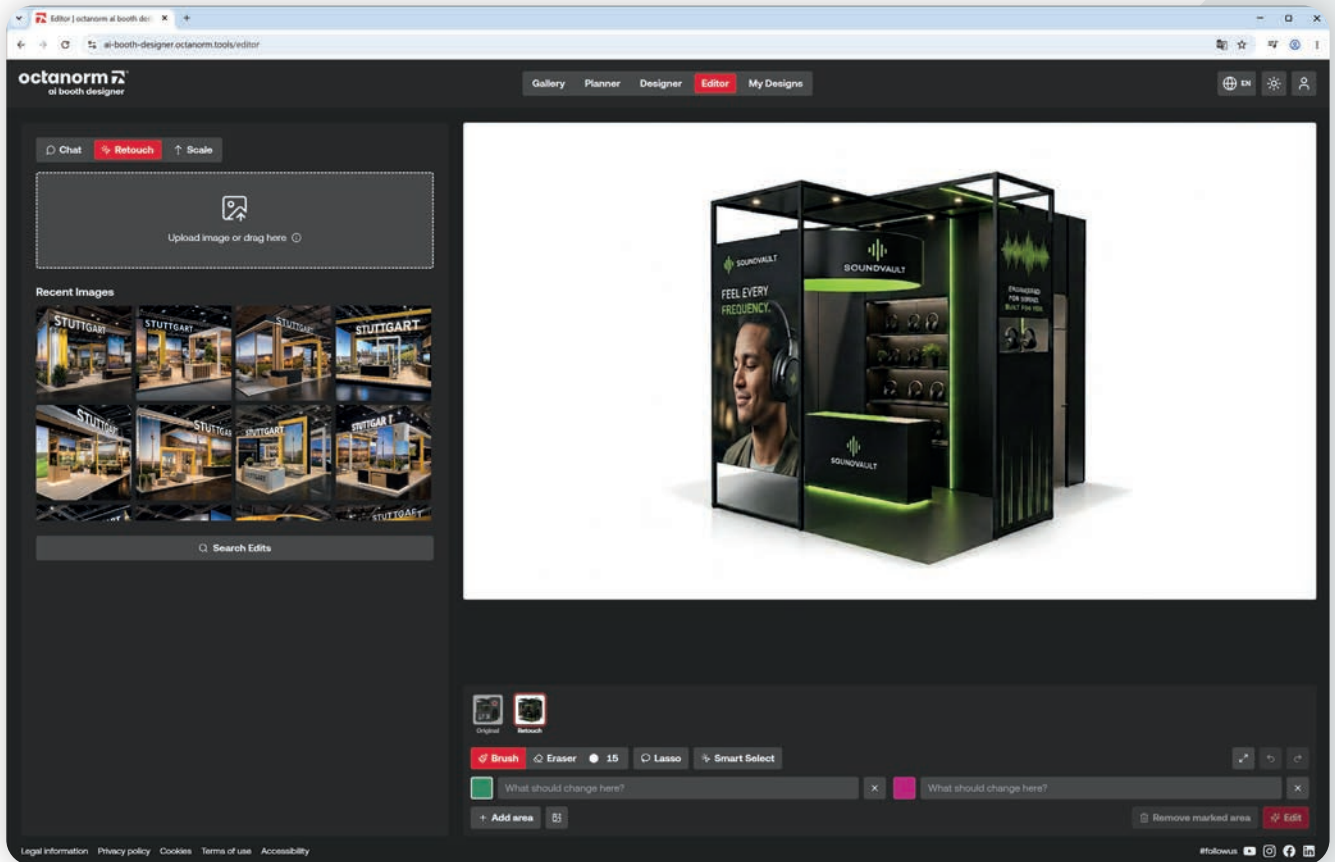

In the Editor, a strong initial concept becomes exactly the design you need. Continue editing existing designs directly in the **ai booth designer** without having to start from scratch every time.

Use the chat function to make changes via text or voice.

ai booth designer

Workflow: Editor

Adjust individual areas of your generated booth design, upscale images and extend them as needed.

More control over your design.

Edit via chat.

Simply describe the changes you want using text or voice.

Retouch precisely.

Edit or remove individual elements and integrate your own logos and graphics.

Scale flexibly.

Improve image quality and use AI to extend backgrounds for new formats.

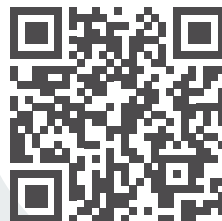

Get started!

Your next booth idea starts here.

Planner. Designer. Editor.

One workflow for powerful exhibition booth ideas.
