

maxima

40/80/120/160

The maximum in exhibition systems.

time less.

Classics need not be reinvented. They withstand the test of time. They are revived by the creativity of their users and can be found in ever-changing areas of application. These unpredictable combinations keep you alive. Small adjustments allow for the use of the latest technology. True to the motto: Keep it simple. Therefore the question is not: What comes after the classic **maxima** in exhibition construction? Rather: What new applications are we talking about? And what adaptations are necessary for this? Here are a few imaginative answers.

**keep
it

light weight. filigree. convertible.

The maximum in the retail and display market.

Do you need a system that is ideally suited for smaller exhibition booths, displays and the retail sector? That's no problem with **maxima 40**. Thanks to its low weight and extrusion depth, it can be used for furniture all the way to individual booth constructions. And up to a construction height of 3 metres: completely covered with fabric and panels, exposed, or in combination with the **octafloor** floor system and the **octawall 40** wall system.

octalumina 40 provides additional bright accents. Get the most out of your products – over and over again.

Display, retail, or exhibition? Everything!

Short assembly times and quick change of location. This is precisely where the strengths of **maxima 40** lie. Small, light and versatile, it is suitable for any product and can be easily transported.

Fashion today, food tomorrow.

With **maxima 40** you don't have to do without your corporate design! Our system can be dressed up over and over again. With glass, panels or fabrics. On one or both sides. Quickly adaptable thanks to practical system groove. And all this without any visible extrusions. So the focus is always on the most important thing: Your product and your brand presentation.

Show corners and edges – with curves.

Break out of the 90° world: Curved extrusions enable new styling and fresh designs. Let your creativity run free and don't hold on to straight lines. Our variable angle connectors offer additional freedom.

Our system groove. Countless possibilities.

Wallwashers, shelves, magnetic holders and much more – a variety of accessories can be inserted into our system groove. Perfectly coordinated, additional features and articles can be easily added.

Customised furniture.

According to your ideas and requirements! Exposed or dressed up. Due to the low extrusion depth, the profiles are perfectly suited for use as product carriers – without distracting from the product. And can be rearranged, combined and adapted again and again. Coated in your RAL colour on request.

Various glass and panel holders such as M 1392 ensure easy mounting of glass surfaces and panels.

The wall mounting extrusion M 1562 offers a further possibility to integrate panels, even without drilling holes in the front.

The wallwasher M 1497 illuminates panels evenly from top to bottom – up to a height of 2.5 m.

maxima 40 stands for design versatility.

With **maxima 40**, curved extrusions in various radii are no problem. In combination with **octalumina 40**, illuminated surfaces can be seamlessly integrated or suspended from the system groove. The **octawall 40** frame system also offers curved walls and continuous graphics.

versatile. durable. dynamic.

The maximum of freedom.

The optimal system for your exhibition booth: The extrusion depth of 80 mm offers stability for heights up to 6 metres – free-standing, or as a complete room solution including door element. Can be completely covered with fabric and panelling. Additional attention is drawn to your advertising message by integrated LED panels and **octalumina** light frames. As versatile and combinable as no other system. In short: With **maxima 80**, you are already ready for the future.

Perfect for exhibitions? Yes. But not only!

Versatile. Stable. Adaptable. Everything you need at an exhibition. Reusable and light due to the aluminium material. Perfectly combinable with other **octanorm** systems. A system with added value that is suitable for exhibitions of any kind. With **maxima 80** you stay flexible.

From floor to ceiling.

Visible or not, **maxima 80** extrusions always achieve top performance. Besides cladding with panels or fabrics, the main advantage of the system is its compatibility with other systems such as **octalumina 80** light frames or **octarig** ceiling constructions.

Videos instead of pictures: LED Panels.

It is hard to imagine exhibition booths without LED panels. But this does not require a complicated substructure. The LED panels are simply hooked into the keyholes of the **octauniversal** upright using our special brackets. This way you can always integrate the latest panels from your manufacturer of choice. Highest quality. Highest safety. Without restrictions.

With the mounting set W 835, octalumina 80 light frames are integrated flush into the system.

The double floor system octafloor allows for the efficient laying of pipes and cables as well as platform construction.

The adapters can be mounted onto LED panels of different manufacturers.

The basis for creative booth designs.

With an extrusion depth of 80 mm, **maxima 80** is perfectly compatible with **octalumina 80** light frames or the **octawall pro** frame system. For impressive ceiling constructions, **octarig** delivers – either suspended or supported at heights of up to 6 meters. Let your creativity run free – **maxima 80** provides the foundation: flexible, stable, and perfectly tailored to your needs.

supportable.**

Stability that you can see.

Extrusions as a design element? With their slick and balanced shape, **maxima 120** and **160** are particularly suitable for designs that play with cladding and exposed extrusions. Can be installed up to 6 meters high, the system promises to stand out from the crowd – and thanks to special coating also in your desired color.

Big, bigger, maxima.

Visible constructions and extrusions. Booth designs that require a lot of freedom. With an extrusion depth of 120 and 160 mm, this system focuses on its columnar appearance. The high span bridges large areas easily – without any additional support. And to ensure that the system matches your brand image, the extrusions can be coated in your preferred color: **maxima 120** or **160** as a supporting design element.

Exposed. And dressable.

Just like the rest of the **maxima** family, the system can be covered with panels and fabrics. On one or both sides. Stable and securely mounted – ready to spread your exhibition message. The suspension system **octarig** and the double-deck system **octa-max** create additional space on your booth. Further eye-catchers can also be placed in combination with **octalumina 120**. Leave nothing to chance and guide the attention of your visitors!

Expand your booth space by adding another level with our double-deck system **octamax**.

Glass panels can be placed in front or inserted into the system groove using the E 420 glass retaining extrusion.

Elegant. Minimalist. Customizable.

With **maxima 120** and **160**, the extrusions themselves become the central eye-catcher. Coated in a wide range of RAL colors, they flow throughout the booth architecture. Additionally, **octalumina 120** light frames create striking highlights in the booth design. The double-deck system **octamax** expands the booth space with a second level. With **maxima**, there are no limits.
