

Example 2:
Ceiling connection
Wall panel height adapted to the
lower height of the ceiling beam end's.

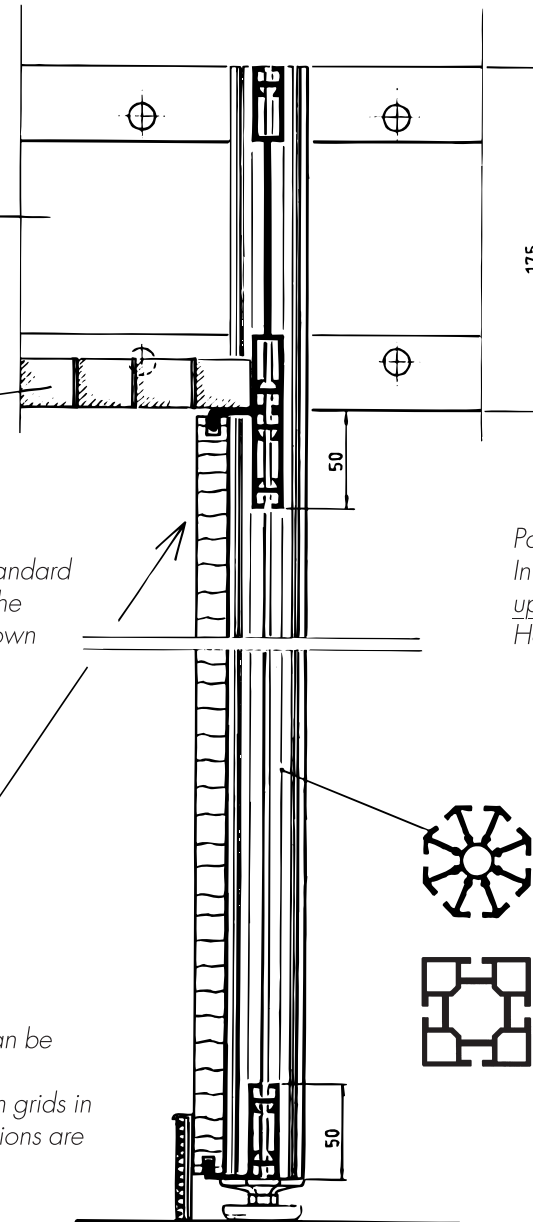

Ceiling beam Z 508
(Front wall with ceiling
internally or externally)

Aluminium grid D 150

Important:
Panel retainer W 108 (standard
construction) conflicts in the
ceiling beam area as shown
in the example.

Beam extrusion W 101
(also used on top)

Advantage: – ceiling beams can be
installed flush
– D 150 aluminium grids in
standard dimensions are
applicable.

Panel format:
In connection with
uprights S 110, S 108
Height = $2480 - (175 - 2 - 2)$
H = 2301 mm
