

W 420 is a universal sliding door that can be installed in an octawall 40 wall. The door can be installed in 4 different positions, depending on requirements. For this purpose, the door's guide has a modular design. Due to this modular design, the door can be opened to the left or to the right and can be installed either in front of or behind the wall.

The guide consists of the following parts:

1. guide rail W 420-7
2. floor rail W 420-8
3. runner extrusion E 471-1
4. ceiling rail W 420-9
5. bottom plate W 420-10
6. sliding door handle W 420-6

With different arrangement of these parts, the sliding door can be installed in the following mounting variants:

Variant 1: Sliding door opening in front of the wall. Door stop on the right.

Variant 2: Sliding door opening in front of the wall. Door stop on the left.

Variant 3: Sliding door opening behind the wall. Door stop on the left.

Variant 4: Sliding door opening behind the wall. Door stop on the right.
